EDUCATION

University of Waterloo

Bachelor of Software Engineering, Honours Software Engineering, Co-op

Waterloo, Ontario, Canada

September 2025 — May 2030

Vanier College

Diploma of College Studies, Computer Science & Mathematics

Montreal, Quebec, Canada

2023 — 2025

- Global R score: 32 | Honour Roll: Fall 2023, Winter 2024, Fall 2024, Winter 2025

SKILLS

- **Languages:** English (Native), Chinese (Native), French (Professional working proficiency)
- **Programming Languages:** Java, Python, Shell, C, C++, Kotlin, Rust, Swift, Typst, LaTeX

EXPERIENCE

Software Developer

September 2025 — Present

Waterloo Rocketry

Waterloo, Ontario, Canada

- Built Mission Control System infrastructure to enhance deployment efficiency and system reliability by implementing Docker containerization and Ansible configuration management.
- Implement Python-based data acquisition and processing systems and PyTest-based unit tests.
- Mentored less experienced team members to improve the team's overall software development capabilities by teaching software development best practices, tools, and collaborative workflows (e.g. git, unit testing, pull request workflow, etc.)

Teaching Assistant (Java), Data Structures and Object Oriented Programming

January 2025 — May 2025

Vanier College

Montreal, Quebec, Canada

- Supported 61 students to improve subject comprehension by clarifying course concepts and assignment requirements.
- Graded 6 assignments to evaluate student performance by providing timely and constructive feedback.

Coordinator & Tech Lead

September 2024 — March 2026

Vanier FLOSS Club

Remote

- Organized annual day-long unconference events promoting Free/Libre and Open Source Software awareness and adoption, attracting 50+ attendees; delivered talks on how to contribute to FLOSS projects.
- Built and maintained the software and infrastructure supporting the club's activities.
- Led and mentored club members in developing software projects actively used by the club.

Community Support Team Member & Chatbot Developer

March 2021 — July 2023

LittleSkin.cn

Remote

- Supported a community of 1,000+ users and Minecraft server administrators on the LittleSkin platform, one of China's largest Minecraft skin and authentication services.
- Assisted in developing an internal utility chatbot in Python to streamline common support and moderation tasks.

PROJECTS

Developer, Typstify

July 2024 — Present

- Developed the application, a Typst editor for iPadOS, using Swift, SwiftUI, and Rust bridged by chinedufn/swift-bridge.
- Contributed to 3 open-source dependencies of the project.

Maintainer, ungoogled-chromium-macos

November 2023 — Present

- Maintained macOS packaging of the Ungoogled-Chromium browser by tracking and packaging Chromium updates downstream, resulting in 100+ timely macOS releases delivered to over 5,000 users.
- Optimized GitHub Actions workflows to automate builds and releases, reducing CI build time by 40%.
